

# Sametime 2 Skype™

Joining Worlds of Communication

## You use IBM Lotus Sametime / Notes 8.x and ...

- are at the same time a convinced Skype™ user with a high international communication volume?
- are interested in a user-friendly integration of VoIP- and real time communication in one interface?
- want to conduct Skype™ calls directly from your Sametime / Notes client?
- would like to drastically reduce your communication expenses?

## Use Pentos Sametime 2 Skype™ because it ...

- integrates via a plug in the functionality of Skype™ into the Lotus Sametime / Notes client thus helping you to save communication expenses by using VoIP technology
- converts Lotus Sametime / Notes into the central gateway for your instant messaging accounts
- displays both the online status and the contact data of your instant messaging contacts
- allows the sending of file attachments in Notes via Skype™

## What is so special about Pentos Sametime 2 Skype™?

- Simply and integrated communication
- Easy information exchange team-internally as well as team-spanning
- Broad range of functionality including access to all contact information
- Eclipse-based and thus scalable to the special demands of your company
- Extremely user-friendly and intuitively operable

**In Short:** Pentos Sametime 2 Skype™ is the ideal tool to integrate IBM Lotus Sametime / Notes and Skype™ via a single interface.
