

### You Use Lotus Notes and...

- you need to communicate a lot by phone, nationally and internationally?
- you therefore struggle against high costs and you would like to economise?
- you want to abridge the long-winded search for phone numbers?
- you would like to see whether your conversational partner is online before calling in order to avoid talking to the mailbox?
- you are no longer willing to separate email, chat and oral communication?

### You Need Pentos Notes 2 Skype™ as the Tool...

- integrates the VoIP freeware Skype™ in Lotus Notes 7
- establishes the connexion with your communication partner per mouse click
- adds to radically minimising the communication expenses as Skype™ users can talk to one another cross-border and free of charge
- indicates at all times whether the interlocutor is online

### What is so Special About Pentos Notes 2 Skype™?

- High user-friendliness and easy handling
- Connects the communication partners automatically
- Verification of availability

**In short:** Pentos Notes 2 Skype™ combines all the advantages VoIP offers (fast connexion, low communication costs, platform independence) with those of Lotus Notes (structured data management, organisation of conference calls)

### Technical Requirements

- Lotus Notes, release 7
- Internet access
- Skype™ version 3.x
