Leading-Edge Governance, Risk & Compliance

Clarity and Control with Pentos and IBM OpenPages

IBM Gold Partner

Governance, Risk & Compliance Management

Design. Implement. Scale.

In today's fast-moving business environment, managing Governance, Risk & Compliance effectively is more critical – and more complex – than ever. IBM OpenPages is a scalable, AI-powered Governance, Risk & Compliance solution that helps organizations identify, assess, and remediate risk with greater speed, transparency, and consistency. With an intuitive user interface, integrated dashboards, and seamless connection to watsonx.governance, OpenPages supports responsible AI adoption, model risk governance, and regulatory compliance across the enterprise. Multilingual AI support and a virtual Governance, Risk & Compliance assistant enhance accuracy and efficiency – empowering thousands of users across your organization to engage confidently with risk. Start small, scale quickly, and stay ready for what's next.

The Governance, Risk & Compliance Solutions:

IBM OpenPages is an AI-powered, modular platform that helps organizations manage risk and compliance across the enterprise. The following solution modules are available within the IBM OpenPages platform:

- Operational Risk Management
- Regulatory Compliance Management
- Policy Management
- IT Governance
- Internal Audit Management
- Business Continuity Management
- Third-Party Risk Management
- Financial Controls Management
- Data Privacy Management
- Risk Management for ESG
- Model Risk Governance
- AI Governance (watsonx.governance toolkit)

Now integrated with AI Capabilities:

Boost efficiency with AI-driven search, smart recommendations, automated risk classification, and real-time policy translation.

Future-proof your business with IBM OpenPages and Pentos expertise
