Success Story

Pentos eXeLENT: Document Generation for SAP SuccessFactors

"With over 100 templates for document creation in German and Polish, the Pentos eXeLENT Document Generation has become a key factor for efficient HR work at our company."

"As a longtime SAP SuccessFactors customer, we successfully employ the Pentos eXeLENT solution for document generation. With over 100 templates for document creation in German and Polish, the Pentos eXeLENT Document Generation has become a key factor for efficient HR work at our company. We can easily, independently and securely access the data from SAP SuccessFactors and transform them into professional documents individually and/or in batches.

The best part is that our solution is natively integrated into SAP SuccessFactors. This enables us to save time and resources by eliminating the need for additional software. We have the flexibility to customize the templates according to our needs without relying on external support.

The implementation of the document creation solution has significantly improved our workflows and enabled us to work more efficiently and effectively. We were able to replace old HCM "on prem" solutions with this solution and thus further increase the use of SAP SuccessFactors. We are impressed with the seamless integration, speed and the user friendly nature of the solution.

We recommend this solution to all companies that use SAP SuccessFactors and intend to optimize their document creation processes, especially when migrating from SAP HCM to SAP's cloud-based solutions."

Volker Krahe, Manager HR-Services, The Lorenz Bahlsen Snack-World GmbH & Co KG Germany

Pentos eXeLENT („Employee Experience Layer through Engaging Technology") is a technology framework for all your UX requirements with a wide range of functional extensions and smooth integration into the SAP SuccessFactors platform.

Pentos eXeLENT Document Generation is an extension for SAP SuccessFactors that enables automatic generation of documents by prefilling document templates with real-live data from SAP SuccessFactors.
✓ No additional platform required
✓ Uses roles and permissions directly from SAP SuccessFactors - with no additional effort and 100% secure
✓ Direct utilization of Microsoft Office and Google Docs document templates; generated documents can be shared directly to customer-specific folders, document management systems, or document archives
